

Big money and special interest are ruining the political process and robbing us of genuine representation. The "Donation Free Campaign" changes that and restores the power to the residents. It is a campaign that puts the residents forward and first. It is a campaign where everybody has an equal voice, no favorites based on donation or special interest. So save your money and give it to a worthy charity and let the politicians fend for themselves. Make them find creative ways to engage the community without blowing \$100,000's telling you how great they are. Make them come to your door, make them make a phone call, or send an email. Make them understand your issues! Make them earn it! Please do not fall for their slick packaged ads, paid employees, and fake supporters. They all are a mirage! Politics should be a people business, not a money one!
