

Safety and Security:

1. *Enforcement, enforcement, enforcement!* Enforcement is key to any well-run community. There are plenty of existing laws which would protect our community if only they were enforced. Before we make new laws, let's enforce the ones we have. Regular and consistent enforcement sets a standard that residents and visitors, and businesses will appreciate.
2. Increase police officers patrolling by way of bike and by foot. We are a pedestrian city and we need police at the pedestrian level. Too often, crimes occur where cars can not go. If police were to patrol on electric bikes, as I envision, they would be able to cover larger areas without expending much energy and they would be able to navigate through the narrow alleys to reach the pedestrians as the crimes as they occur in real time. The street crime and beach theft is out of hand. I would like to form a police task force to address all beach crime enforcement and prevention.

3. Super Speeders/Reckless Driving needs to be enforced as well! Too often, we hear the squealing of wheels and/or a car going way too fast for the conditions. I have found the complaint is universal on the beach.
4. Our sidewalks, bike lanes, and crosswalks should be created, improved upon, or made safer. Making sure our sidewalks are wide enough and without obstacles not only makes pedestrians feel safe but it is also the law to be ADA compliant. Again, we need to enforce these laws! I'd like to see more bike lane barriers to give the bikers a barrier of protection from the speedy out of control vehicular drivers. Smart thought-out infrastructure equals a safe and happy community.
5. Increase police-to-community outreach. We need to continue to increase police interaction with members of our community. Outreach programs which bring the police and community together in social gatherings of all types

will increase awareness of issues, discussions to resolve them, and strengthen the bonds between community members. The more we hang out, the stronger our community becomes.

6. There should be stiff fines/penalties for any violence/gun violence that occurs in our city. The whole city is completely tired of the never-ending story of street fights and shootings. We deserve better!
7. Add resources to Life Guard, Fire, and Police. They all request things they feel they need to keep us safe. Let's invest there!
8. We must eliminate the problem of people living on our streets. It's not legal and it's inhumane. We must get them plugged into programs/resources that can help them. Living on our streets should not be a solution we accept. I will make this one of my top priorities.

9. Property crime must be enforced and prevented. Beach theft, bike, and scooter theft should be some of our primary focuses.
